

DIPLOMA SUPPLEMENT

This Diploma Supplement follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued successfully by the individual named on the original to which this supplement is appended. It should be free from any value judgements, equivalence statements or suggestions about recognition. Information in all eight sections should be provided. Where information is not provided, an explanation should give the reason why.

1. INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

- 1.1. Family Names: **RIBEIRO AGUIAR**
- 1.2. Given names: **EMÍLIO JÚNIOR**
- 1.3. Date of birth: October 30, 1991
- 1.4. Nationality: Brazilian
- 1.5. Identification Document type and number: Número Passaporte : YC310418
- 1.6. Student identification code: 43766

2. INFORMATION IDENTIFYING THE QUALIFICATION

- 2.1. Name of qualification and title conferred (in original language):
Mestrado em Actuarial Science / Mestrado in Actuarial Science
Mestre / Master
- 2.2. Main fields of study for the qualification:
Statistics and Actuarial Sciences

4.4. Grading scheme and, grade distribution guidance:

4.4.1. National classification scale:

It is necessary to achieve a minimum grade of 10 in each curricular unit for approval, in a 0 to 20 grading scale. To complete a qualification, to which it will be assigned an overall classification from 10 to 20, the student is required to pass all course units (compulsory/optional) of the study plan. The final classification result is calculated using the weighted average number of ECTS credits earned in each approved course units, expressed in the following equivalences:

10 to 13 marks - Satisfactory
14 to 15 marks - Good
16 to 17 marks - Very Good
18 to 20 marks - Excellent

Diploma Supplement

Student: EMÍLIO JÚNIOR RIBEIRO AGUIAR number: 43766

4.4.2. ECTS classification scale:

ECTS Grade	% of Students Approved	Definition
A	10	Excellent - outstanding performance with only minor errors
B	25	Very Good - above the average standard but with some errors
C	30	Good - generally sound work with a number of notable errors
D	25	Satisfactory - fair but with significant shortcomings
E	10	Sufficient - performance meets the minimum criteria

The ECTS classification scale (European scale of comparability of classifications), for graduates and for students that pass course units, is composed by five levels, identified by letters A to E (where A is the highest and E the lowest grade), and aims to simplify the comparison between the classification scale used at national level and those current in other countries and to make more transparent the process of evaluation and the academic recognition of the results obtained.

Classifications A, B, C, D and E will be awarded to 10%, 25%, 30%, 25% and 10% of the students, respectively. The setting of the classifications included by each one of the levels of the European scale of comparability of classifications is carried out: (i) for each programme, of each cycle of studies; (ii) for each course unit. The awarding of classifications according to the ECTS is based in the distribution of marks, from 10 to 20, of the graduates (or students that pass a course unit), in the three academic years before the one when the graduate (or student) completed the qualification (or passed the course unit), in such a way that the number of graduates (or students that pass a course unit) in that period is not below 100. When such dimension (one hundred) is not reached for that period, it will evolve, at each stage, to: (i) the 4th year before; (ii) the 5th year before. If the referred dimension is still not verified, the grading scale for students that pass course units will be replaced based on the grades of the corresponding academic year and the grading scale for graduates will be replaced based on the final grades, of at least, the last 3 academic years that preceded the year in which the student obtained approval, by the following notation:

$\frac{1}{2} \frac{1}{2} \frac{1}{2}$

key:

- 1 - Ordinal number of the "licenciado" degree holder/student in the list of passing grades of the degree/course unit;
- 2 - Number of "licenciado" degree holders/students who have passed the course unit with the same grade;
- 3 - Number of "licenciado" degree holders/students who have passed the course unit in the academic year.

Please note that not all of the ECTS grading scale might be represented and is registered with NA = not applicable.

4.5. Overall classification of the qualification:
